DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-4, 9-12, and 16-18 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

Claims 9 and 10 are objected to because of the following informalities:

These claims depend from a cancelled claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Krofchalk (5,370,576)** in view of **Abramson (4,031,665)**. **Krofchalk** discloses a door (12) configured to permit person to enter and exit through the door receiving cavity and inherently pivots between an open and closed position, multiple fans (90) are positioned in the door and are capable of moving the air in the same or in opposite directions. **Krofchalk** does not specifically recite the door having an expandable sides on its opposed frame. **Abramson** teaches an transparent adjustable entrance door (10)

having an expandable frame (12) (SEE figure 2). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to which the subject matter pertains to have modified the door of Krofchalk to include the expandable sides as taught by Abramson for the purpose of providing adjustability in order to fit different size door cavity openings.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over **Krofchalk (5,370,576)** in view of **Abramson (4,031,665)** and further in view of **Van de Laar (6,216,402)**. **Krofchalk** in view of **Abramson** teach the applicants primary inventive concept as stated above, including an expansion system but does not particularly teach an expansion system having a scissor expansion assembly. **Van de Laar** teaches a scissor expansion assembly (20) which can be used in a door assembly (SEE column 1, lines 30-36). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to which the subject matter pertains to have modified the expansion system as taught by **Krofchalk** in view of **Abramson**, to further include a scissor expansion assembly as taught by **Van de Laar** for the purpose of securely fitting a door assembly within an opening (ie: door cavity).

Allowable Subject Matter

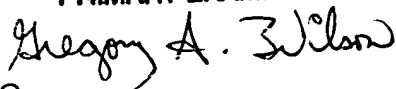

Claims 12 and 16-18 are allowed.
